

WELCOME

Get connected to the WIFI with a simple "tap":

- 1) Turn on NFC on your phone
- 2) Tap the device for a couple seconds

The location of the NFC reader on your phone may vary depending on the model and brand. Try to move the phone around a bit if there is no response.

- 3) Accept or click connect
- 4) You are online

If your phone does not support NFC you can scan the QR code or type in the network information located on the back.

This is TapThat.no

Do you often forget your network password? It happens to the best of us. Or do you have a very long network password that is hard for guests to type in? With TapThat all these problems fade away! With a single "tap" you are connected to the internet.

The product is made of recycled fiberglass, and is both produced and assembled in Norway. Each design is unique. Good for the environment, good for your guests!
